EDUCATION

ETEC Abdias do Nascimento

Technical High School Diploma in Systems Development

São Paulo, Brazil

Jan 2023 – Dec 2025

EXPERIENCE

Software Engineering Intern

May 2026 – Present

THE LED Oficial

São Paulo, Brazil

- Architected and built a full-stack web platform using Next.js, TypeScript, and PostgreSQL, supporting 100+ concurrent active users with consistent performance and stability
- Automated payroll processing and distribution via the Microsoft Graph API, eliminating manual work and delivering 400+ pay stubs monthly with full accuracy
- Integrated the DocuSign API for contract and document delivery, streamlining response times and removing bottlenecks in the signature workflow
- Wrote automated tests with React Testing Library and Playwright covering core platform flows, increasing system reliability ahead of each deployment
- Centralized and cross-referenced sensitive data across ERP (TOTVS) and RD Station systems, improving communication across key departments (Finance, Sales, HR, and IT)
- Built a CI/CD pipeline for automated pre-deployment validation, preventing test-flagged errors from reaching production
- Documented system architecture and key integration flows (TOTVS, DocuSign, RD Station) following best practices, streamlining onboarding for new developers and long-term maintainability
- Built an automated pull request reviewer using DeepSeek, flagging critical, moderate, and minor issues before merge
- Built agent and MCP workflows with Claude Code, improving the team's development cycle efficiency

Operations Intern

Feb 2026 – May 2026

Concentrix

São Paulo, Brazil

- Structured and automated spreadsheets using advanced formulas, data validation, and visualization tools, improving the organization, presentation, and analysis of information to support decision-making
- Developed executive PowerPoint presentations focused on visual clarity, structure, and information hierarchy, following the company's corporate communication guidelines
- Developed internal initiatives aimed at improving cross-team communication and collaboration, contributing to greater organizational process efficiency

PROJECTS

Libralizei | TypeScript, Node.js, React, PostgreSQL

Jan 2025 – Dec 2025

- Collaborated on a full-stack web platform, built with TypeScript, Next.js, Node.js, and PostgreSQL, for teaching foundational Brazilian Sign Language (LIBRAS), developed as a capstone project
- Modeled the PostgreSQL database using raw SQL queries, structuring storage for course content and user progress
- Integrated MediaPipe to build real-time camera-based sign recognition pipelines for LIBRAS, improving recognition accuracy by up to 75%

Oracle Discovery Data | Python, OAC, MySQL

Sep 2024

- Used Python with OAC (Oracle Analytics Cloud) to build interactive dashboards processing 1,000+ real data points, supporting an augmented reality app prototype for physical exercise assistance
- Presented the prototype pitch on stage at Oracle to company representatives, communicating the technical solution clearly and effectively

TECHNICAL SKILLS

Languages: Python, TypeScript, C/C++, SQL (PostgreSQL, MySQL), JavaScript, HTML/CSS

Frameworks: React, Node.js, Express, Next.js, MediaPipe

Testing: Playwright, React Testing Library

Tools: Git, GitHub, GitHub Actions, Docker, VS Code, Visual Studio, PyCharm

AI Tools: Claude Code, DeepSeek, Codex, Kimi, OpenCode

Languages Spoken: English (Advanced) / Portuguese (Native)
